Executive Summary

Prosource Mineral Processing Plant Services Corp. Works is a Philippine-based engineering and industrial services company specializing in industrial plants. Our expertise covers concrete batching plants, stone crushing plants, asphalt plants, and mining processing facilities.

Business Overview

We provide end-to-end technical solutions including installation, commissioning, maintenance, engineering support, and parts supply. Our company is built on strong industry experience, technical competence, and a commitment to delivering reliable and costeffective services to clients across the Philippines.

Industry Coverage

Prosource Mineral Processing Plant Services Corp. serves a wide range of industries that depend on mineral processing and heavy equipment systems. Our expertise spans concrete batching, aggregate crushing and screening, asphalt production, mining and mineral processing, and construction materials manufacturing. We provide end-to-end technical support for new plant installations, ensuring proper design, installation, and commissioning for optimal performance.

For existing facilities, we offer comprehensive upgrades, process optimization, and rehabilitation services to enhance efficiency, reduce downtime, and extend equipment life. With extensive field experience and deep technical knowledge, we deliver practical solutions tailored to the specific needs of each client, helping them achieve reliable operations, improved productivity, and long-term operational excellence.

Core Business Activities

1

Installation and commissioning of mineral processing plants.

2

Mechanical and electrical business engineering services.

3

Plant trouble shooting and process optimization, preventive and corrective maintenance.

4

Supply of parts, components, and industrial equipment.

5

Technical training and operational support.

Engineering & Technical Services

Our Engineering and Technical Services cover plant design support, equipment troubleshooting, process optimization, and operational improvements. We provide practical technical solutions to ensure efficient, safe, and reliable plant performance throughout the entire equipment lifecycle.

1. Installation and Commissioning

We provide full installation services for new plants and equipment, ensuring proper mechanical, electrical, and process integration. Our team handles:

- Equipment assembly and erection
- Start-up support
- System testing and calibration
- Performance verification

2. Maintenance and After-Sales Support

Reliable after-sales service is a key part of our operations. We offer:

- Preventive Maintenance Service (PMS)
- Repairs and refurbishments
- Major equipment overhauls
- On-site technical support
- Emergency troubleshooting

3. Plant Optimization

We assist clients in improving the performance of their facilities through:

- Process evaluation
- System upgrades
- Efficiency improvements
- Operational recommendations

4. Parts Supply and Trading

We supply a wide range of spare parts and components for different brands and models of MPP equipment, helping clients maintain continuous and uninterrupted operations.

5. Training and Technical Development

To support long-term plant reliability, we conduct:

- Operator training
- Maintenance personnel training
- Safety and technical seminars
- Equipment handling and best practice programs

Partnership & Industry Experience

Over the years, Prosource Mineral Processing Plant Services Corp. has built strong relationships with major Chinese and European manufacturers of mineral processing equipment operating in the Philippines. Acting as a primary installer and service partner for various international brands, we have successfully supported projects across Luzon, Visayas, and Mindanao. These partnerships allow us to deliver services that meet global standards while leveraging local expertise and ensuring responsive, reliable support for our clients

»» **Mission**

To deliver dependable engineering solutions, quality parts, and professional technical services that help clients operate their plants safely, efficiently, and profitably.

Commitment »» **to Client**

We are dedicated to delivering professional, reliable, and cost-effective solutions while building long-term partnerships with our clients.

Vision ««

To become a trusted leader in mineral processing plant services, recognized locally and globally for technical excellence, reliability, and customer-focused solutions.

Service Coverage ««

We provide professional engineering and technical services across the Philippines, with plans to expand our expertise to international markets. Today – the Philippines. Tomorrow – the world.

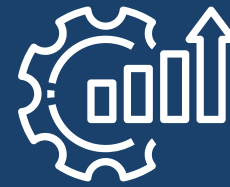

WHY CHOOSE US?

RIGHT-FIRST-TIME INSTALLATION

We ensure proper setup and commissioning to reduce downtime, prevent recurring issues, and avoid costly repairs.

MAXIMIZED PRODUCTIVITY & ROI

Our efficient processes help clients focus on operations, achieve faster returns on investment, and maintain smooth plant performance.

RELIABLE LONG-TERM PERFORMANCE

With strong expertise and attention to detail, we deliver dependable systems that operate efficiently from day one.

**TMJT
CONSTRUCTION -**
Gonzaga, Cagayan

**40 TPH Asphalt and Crushing
Plant Optimization**

Completed: *September 2025*

Our team optimized the production process of TJMT Construction's asphalt plant by streamlining operations, improving material utilization, and formulating the correct asphalt mix design to meet DPWH standards. The plant achieved improved productivity and asphalt quality that exceeded DPWH requirements.

**TERRA NORTE
AGGREGATES**
Sarrat, Ilocos Norte

**350 TPH Vibro Crushing Plant
Upgrade**

Completed: 2025

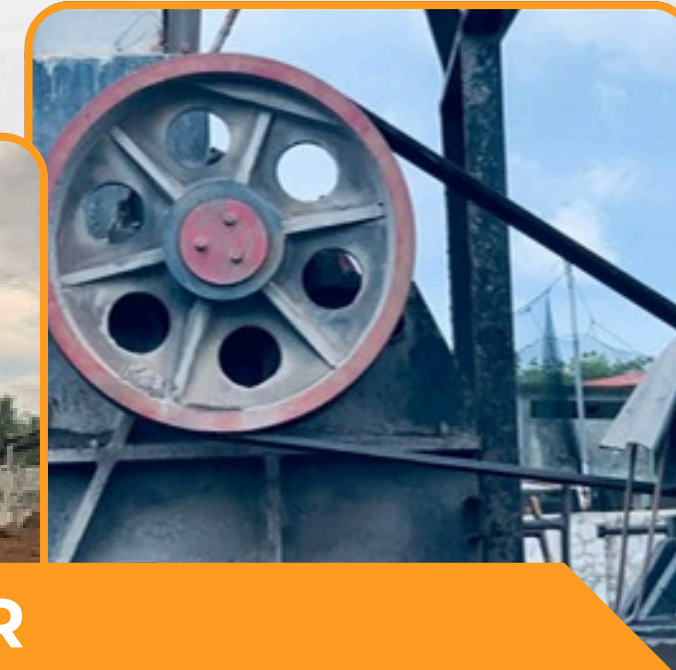

Major upgrades and process optimizations were performed on Terra Norte Aggregates' 350 TPH vibro crushing plant. The improvements increased plant efficiency and production capacity, allowing the facility to exceed its target output.

BICOL PRIME -
Baao, Camarines Sur

80 TPH Stone Crushing Plant
Completed: *April 2022*

Prosource Mineral Processing Plant Services Corp. designed and built a 50–80 TPH stone crushing plant for Bicol Prime, one of the most recognized companies in the Bicol region. The project delivered a reliable and efficient crushing system capable of producing consistent, high-quality aggregates.

**RPJR
CONSTRUCTIONS -**
Bato, Camarines Sur 📍

**30 TPH & 250 TPH
Stone Crushing Plants**

Completed: *September 2025*

Prosource Mineral Processing Plant Services Corp. engineered and installed two stone crushing plants for RPJR Construction, a 30 TPH plant in Bato, Camarines Sur and a 250 TPH plant in Baao, Camarines Sur. The systems were designed to ensure reliable operations and consistent aggregate production.

**BELLEZA
CONSTRUCTIONS -**
Camalig, Albay

250 TPH Stone Crushing Plant

Completed: *September 2025*

Prosource Mineral Processing Plant Services Corp. delivered a full plant installation from foundation works to commissioning and personnel training for Belleza Construction's 250 TPH crushing plant, ensuring efficient operation and long-term plant reliability.

**FARSEC
VENTURES CORP.**

Banate, Ilo-Ilo 📍

**150 TPH Crushing Plant
Optimization**

Completed: May 2025

Prosource Mineral Processing Plant Services Corp. was engaged to improve the performance of Frasec Ventures Corporation's 150 TPH crushing plant in Banate, Iloilo. Our team conducted a comprehensive evaluation of the plant's operations and implemented targeted corrective actions, system improvements, and process optimizations to enhance production efficiency and overall plant output. The successful results significantly improved plant performance and operational reliability, earning the client's confidence and leading to discussions for the development of two additional crushing plants in Mindoro.

**BRE
CONSTRUCTIONS -**
Datu Odin Sinua, Cotabato

**100 TPH Asphalt and 25 TPH
Batching Plant Completion**

Completed: *September 2025*

Prosource Mineral Processing Plant Services Corp. completed the installation and restoration of BRE Construction's asphalt and concrete batching plants after the facility remained dormant for over a year. Operational improvements were implemented to enhance plant reliability, durability, and consistent production output.
